██████████ Proprietary Projects

1. The Acting Chief, Finance Division, recently forwarded to your office copies of a list of ██████████ proprietary projects compiled from their records.

25X1A

2. We cannot be sure that this list is complete since it has not been the practice to formally classify ██████████ proprietary projects as such when they are approved. We believe it is very important that a master list of this type of projects be compiled, and it is therefore suggested that the list forwarded to your office be considered a beginning basis to accomplish the establishment of a master list.

25X1A

3. It will therefore be appreciated if you will take appropriate steps to have the schedule of proprietary ██████████ projects reviewed and advise this office as soon as practicable of any known additions or deletions.
